## Welcome to the 2006–07 Pro-Bolt Catalogue

**Pro-Bolt** - Our roots derive from all corners of the Motorcycle Industry, supplying products to customise, personalise, improve looks and performance – offering an excellent alternative to lost, rusty or simply heavy bolts.

From Streetfighters to Road Race Bikes, Enduro, Trail and Scooters - you'll find a brochure packed with imaginative, exciting and sexy products to improve your machine.

We have reached into new markets where looks and weight are crucial to ensure success. Kart Kits and Cycle Sets, ATV's, Powerboats, Model Making and Yachting all utilise the products Pro-Bolt has to offer.

### Terms of Business

#### DELIVERY

We aim to deliver from stock in 2-3 days, but please allow 4 days for progressing your order. We offer competitive rates for UK 'Signed for' Services and courier charges. If you have an urgent order we do offer an premium guaranteed next day before noon service. Please state this before you order so we can stock check your required items.

#### ORDERING

**Visit one of our UK Stockists:** See the quality of our products first hand. Phone for information on your nearest stockist or see our 'dealer' page on [www.tastynuts.com](http://www.tastynuts.com)

**Phone, fax or post:** See our contact information

**On-line:** [www.tastynuts.com](http://www.tastynuts.com)

#### PRICES

All prices in our catalogue are UK Retail prices, including VAT in pounds sterling. VAT will not be charged to retail customers outside of the EU. VAT will not be charged to registered business outside of the EU, or in the EU if a valid VAT number is provided.

#### PAYMENT METHODS

**Credit or Debit Cards:** Please have your card ready: we accept Mastercard, Visa, Delta, Solo and Switch cards.

**Cheques:** Payable to 'Pro-Bolt'. Please allow 7 working days for cheque clearance.

**Money Orders / Bank Drafts:** On receipt of a Pro-Bolt pro-forma invoice, please send payable to 'Pro-Bolt' quoting your order number.

**Bank Transfers** – HSBC, Tewkesbury, Glos., Sort Code 40-44-10; A/c No. 11220314, Swift Code: MIDLGB2159H; IBAN 05745512

#### SHORTAGES/DAMAGED GOODS

Missing parts or damaged goods must be advised within 48 hours of receipt. Please retain evidence of damaged packaging.

#### RETURNS

To return a product, please contact us for a returns reference within 28 days of purchase. No goods will be accepted without a returns reference. Returned goods, supplied correctly, will be subject to a 10% restocking charge. Our freepost address is: Returns, Pro-Bolt Ltd, FREEPOST SWC4834, Severn Drive, Tewkesbury Business Park, Tewkesbury, Glos. GL20 8SF.

#### DEALER DISCOUNTS

Dealers must be a registered business that sells products to the public. We have a structured dealer network with 2 options.

1. UK Dealer, no minimum stock holding and a standard dealer discount
2. UK Stockist Provided with an exclusivity zone where available and an enhanced discount

For more information and availability of Dealer Discounts please contact Pro-Bolt.

#### ACU DISCOUNTS

Pro-Bolt offer registered ACU racers a 10% discount throughout our range. When ordering please have your registration details ready.

#### CONTACT INFORMATION

**Office hours:** Monday-Friday 9.00 - 5.30 (Answerphone out of hours);

**Telephone:** +44 01684 851940

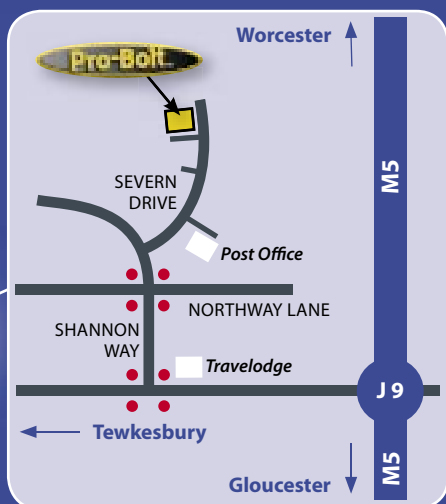

**Freephone Number UK Only:** 0800 0185500

**Fax:** +44 01684 850080

**e-mail:** [info@tastynuts.com](mailto:info@tastynuts.com)

**Post:** Pro-Bolt Ltd, Unit F, 6400 Severn Drive, Tewkesbury Business Park, Tewkesbury, Glos GL20 8SF, UK.

## OUR PRODUCT RANGE

### Aluminium - Tasty Nuts

For a truly individual look and style to customise your machine as **you** choose. We offer a wide range of model specific kits for Motorcycles, Cycle Sets & Rocker Cover Kits. Our lightweight bolt kits make it incredibly easy to replace lost, damaged and rusty nuts and bolts. For the biker we have model specific kits for a huge number of bikes, enabling you to change Engine Casings Bolts, Fairing Bolts, Screen Bolts and Fuel Cap Surround Bolts with no need to measure up your originals - we've done it for you!

Our ever-increasing range of accessories allows you to easily create your individual look and style. You can customise your machine little by little, or make large-scale projects; either way you will be guaranteed colour consistent parts throughout that are machined to a high quality smooth finish. Whichever bike you ride you're sure to find goodies that are both fun, functional and make your bike stand out from the crowd.

All our kits and accessories are available in a choice of Red, Blue, Gold, Purple, Silver, Black and Green.

### Stainless Steel - Buffed Nuts

Fit & Forget! Manufactured from A4 Stainless Steel, which is superior in strength and corrosion resistance to the more common A2 - we are proud to offer an exceptional quality product. Pro-Bolt is the first to provide Tapered Socket Caps, Flanged Hex Heads and Domed/Mushroom Fairing Bolts. We are offering a unique material in unique head styles - and to a mirror finish. Absolutely no polishing is required.

Forget rough nuts and take a close look at our buffed nuts! No stamp marks in the bolt heads or cracked and grainy finishes. No matter how many dark winter nights you spend polishing mass-produced far-eastern bolts, you will never achieve the quality of finish and material we offer. Please be aware that not all stainless steel is suitable for stress areas. However, our A4 stainless steel is suitable for Engine Casings, Fairings, Screens, Front Axle Pinch, Caliper Pinch Bolts, Caliper Mount Bolts, Footrest Hanger Bolts, Clip-On Handle Bar Bolts, Brake/Clutch Pinch Perch, Top/Bottom Yoke Clamp Bolts.

Also available are D-Ring Quick Release Fasteners and Suzuki GSXR/Bandit Cam Bolts.

### Titanium - Tough Nuts

Made from aircraft grade titanium 6AL-4V, the outstanding benefits are that we forge the heads for superior strength and roll the threads to produce greater fatigue strength and reduce galling. These bolts are in excess of 120,000 psi ultimate tensile strength, suitable to replace both grade 5 and grade 8 steel bolts. We carry the UK's widest range of products for the automotive industry. We offer Flanged Hex Head, Tapered Socket Cap, Countersunk, and Dome Head Bolts, Nuts and Washers - from 3mm to 12mm! We also offer Axle Nuts, Swingarm Nuts, Yoke Nuts, Caliper Pins, Banjo Bolts, Disc Bolts and many more specifically machined items.

We have again made it so easy for the biker to replace bolts in stress areas by doing all the measurements for you, and offering the relevant fasteners in kit form.

All our titanium nuts, bolts, washers and specially machined items are available in natural, blue, gold and purple haze.

## Bolt Configuration

### Head

The head is designed to provide a wrenching surface to tighten the bolt to the correct preload. Its size of bearing area depends on the stress level and the hardness of the material being fastened. There must be enough bearing surface to prevent indentation of the material under preload. To minimise the effects of fatigue, a bolt should be tightened or preloaded to an initial clamping load in excess of the maximum working load of the joint.

### Fillet

This area of structural discontinuity is a critical point of stress concentration. The radius where head and shank meet must be smooth and free from flaws. It should be as large as practical, and still provide the necessary bearing area under the head.

### Grip Length

Minimum grip length from protruding head bolts shall not be less than the head-to-shank fillet radius. For 100 degree head bolts minimum grip length shall not be less than the head height plus the head-to-shank fillet radius.

### Shank

The shank must be fully concentric with the thread and with the head. To reduce bending moments, the angle between head and shank axis must be kept to a minimum. The fit between bolt shank and mating hole must be kept to a very close tolerance to maximise shear strength.

### Thread & Pitch

The two most critical thread factors for high strength/high fatigue rating are a generous root radius to minimise notch effect and compressive pressurising achieved by rolling threads after head treatment. The pitch diameters must also be closely controlled for high fatigue applications. Where lock nuts will be used, thread point chamfer must be kept to a minimum. Where thread run-out flares into the shank, there should be no abrupt changes in the cross sectional area.

## Advice on Measuring and Ordering Bolts

We offer the following advice and general information to assist with ordering bolts.

The sequence in which bolts are classified is as follows:

### Head Style

- Flanged Hex Head, Tapered Socket Cap etc.

### Shank Diameter

- M8 (8mm), M10 (10 mm), etc.

### Shank Length

- Measured from beneath the head

### Thread Pitch

- The distance from the crest of one thread to the next

## General Thread Information

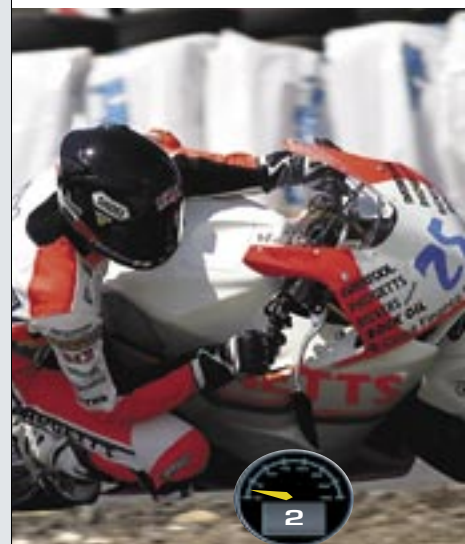

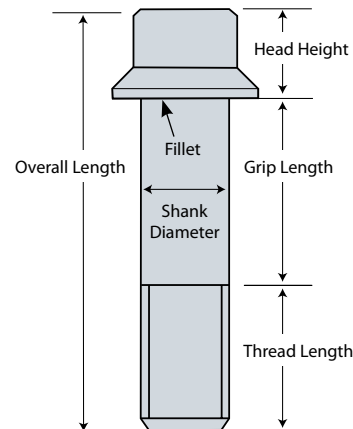

Shorter bolts will usually be fully threaded, longer bolts will have some grip - this is pre-determined by Din / ISO standards. A standard metric screw thread pitch corresponds to the shank diameter. It is the distance from one peak of the thread to the next. A metric screw thread is specified by how far in millimetres it advances in one turn of the screw. For example, if one turn brings it 1mm closer, then it is a 1mm pitch. These are the industry standard thread pitches:

| Diameter   | M3  | M4  | M5  | M6   | M8   | M10  | M10 fine | M12  | M12 fine | M12 x fine |
|------------|-----|-----|-----|------|------|------|----------|------|----------|------------|
| Pitch (mm) | 0.5 | 0.6 | 0.8 | 1.00 | 1.25 | 1.50 | 1.25     | 1.75 | 1.50     | 1.25       |

## Common Sizes Used

The following bolt diameters and pitches are the most common threads and pitches on a bike:

| Area of Application    | Thread                  |
|------------------------|-------------------------|
| Screen                 | M5                      |
| Fuel Cap Surround      | M5                      |
| Fairing                | M5 & M6                 |
| Engine Casings         | M6                      |
| Caliper Pinch Bolts    | M8                      |
| Caliper Mount Bolts    | M10 (1.25) - fine pitch |
| Front Axle Pinch Bolts | M8                      |

## The Pro-Bolt Look

**ALUMINIUM****Aluminium Material Specification - 7075T73****MANUFACTURING PROCESS**

Head – cold formed  
Shank – thread rolled

**ANODISING**

Chemically brightened and colour anodised to between 8 and 12 microns thick

**TENSILE STRENGTH**

0-560Mpa; stronger than mild steel

**WEIGHT**

• 60% lighter than steel • 40% lighter than titanium

**CORROSION**

Saltwater, road film or mild acids do not affect anodised aluminium

**APPLICATIONS**

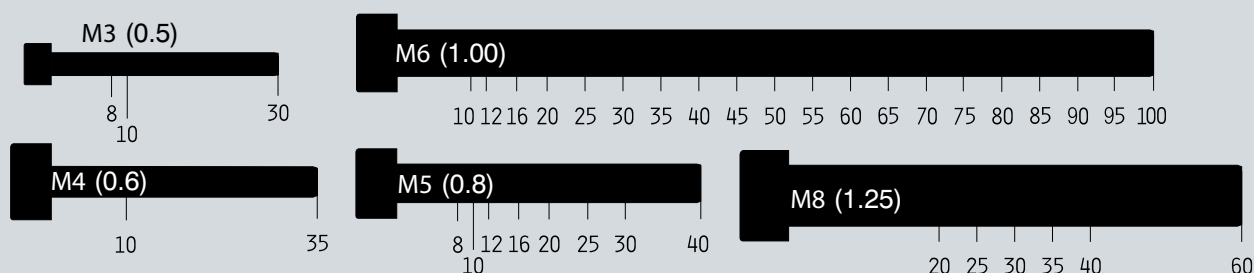

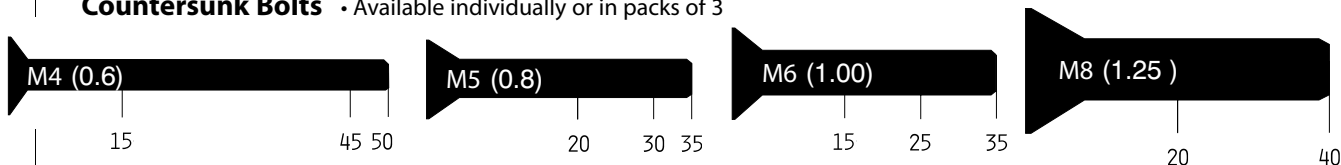

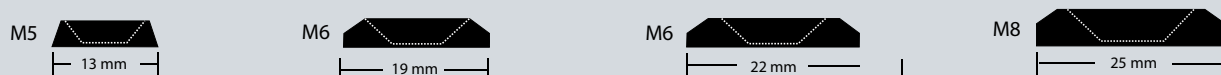

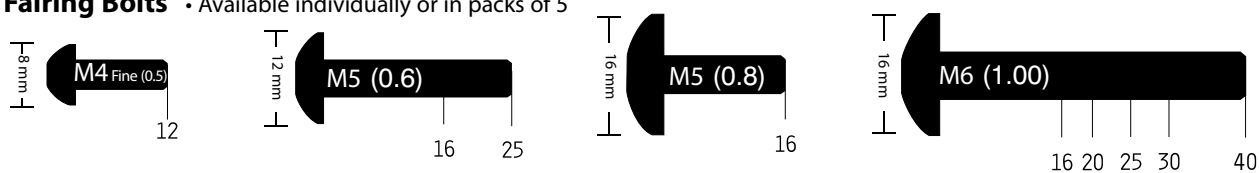

Aluminium is suitable for use in all non-safety critical areas - mud guards, screens, fairings, engine casings, huggers, fuel caps, number plates, lamp units, exhaust cans, heel plates, clutch levers, exhaust manifold brackets, fuel cap surround, air filter, plus many more.

Aluminium is not suitable for any stress area applications.

If you are in doubt as to the suitability of our products for your bike, or to the size you need, please contact Pro-Bolt directly.

**Please Note:**  
items shown  
actual size

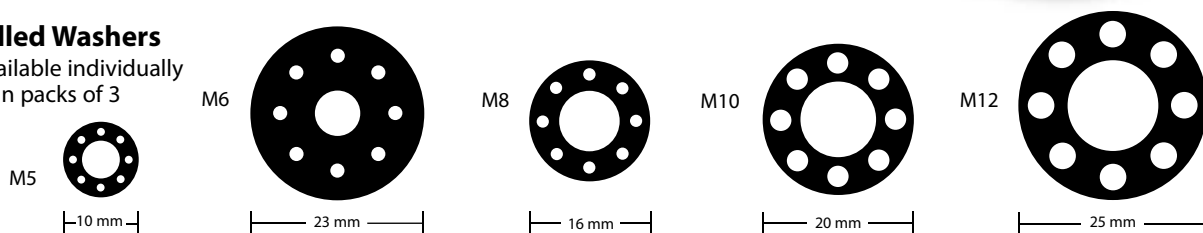

- If you are in doubt as to the suitability of our products for your bike, or to the size you need, please contact Pro-Bolt

**Standard Allen Key Socket Cap Bolts** • Available in packs of 5**Countersunk Bolts** • Available individually or in packs of 3**Countersunk Bodywork Washers** • Available individually or in packs of 3**Fairing Bolts** • Available individually or in packs of 5**Flat Washers** • Available individually or in packs of 5

Full Nuts & Nyloc Nuts are available in M5, M6 & M8 sizes

**Drilled Washers**

- Available individually or in packs of 3

## Pro-Bolt High Tensile Aluminium

All our aluminium products are available in our full choice of colours: Blue, Black, Gold, Green, Purple, Red and Silver.

We provide a specific price list for each manufacturer which gives a price and fitment guide for all our kits and accessories.

### Screen Kits

FROM **£4.49**

Screen kits include the correct amount of 5mm screen bolts, nylon washers and rubber nuts with brass insert. 4mm fine pitch screen kits are also available for Ducati, Cagiva and Aprilia Factory RSVR (as pictured)!!!

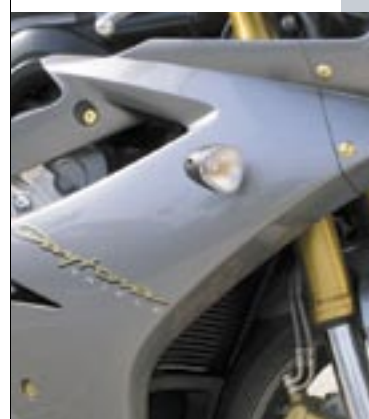

### Fairing Kits

FROM **£9.99**

These kits include all the necessary bolts, nuts and washers to replace all the fairing bolts including side fairing, belly pan, seat unit and mudguard. Anti-scratch bodywork washers, spacers, copper grease and allen keys are also included. Where a Fairing Kit is originally quick release action, this will be replaced with a standard threaded bolt and 'u' clip, thus losing the quick release action. Retaining clips are supplied where necessary.

**Please note:** Screen Kits are sold separately.

See price list for specific fitment for each model

## Quick Release Fasteners

£2.99 EACH

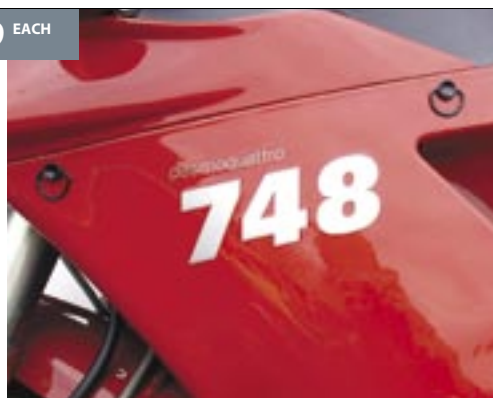

What a cool look and so very light! Makes removal of your Fairing easy and fast - with our alloy fasteners you have our full choice of 7 colours. These D-Ring fasteners are available in the following lengths (measured from under the head)

- 14mm (ideal for thinner race fairings)
- 17mm (most common on road bikes)
- 19mm (mainly used on Honda)
- 24mm (mainly used on Honda)

These can be ordered in 3 ways:

|  |                  |
|--|------------------|
| Individually, no backing clips provided<br>- LQRCLIP **                | £2.99<br>each    |
| Packs of 10, no backing clips provided<br>- QRCLIP1017 **              | £29.99<br>a pack |
| Packs of 10 with 'rivet on' backing clips & rivets<br>- QRPACKRIVET ** | £31.99<br>a pack |
| Packs of 10 with 'slide-on' backing clips<br>- QRPACKSLIDE **          | £31.99<br>a pack |

\*\* Please specify length and colour required.

## Quick Release Fairing Kits

Our Quick Release Fairing Kits will provide D-ring 1/4 turn replacements where quick release are present as standard. All other bolts on the side fairing, mudguard, belly-pan and seat unit will be replaced with standard threaded bolts. This will provide a colour consistent finish throughout the fairing.

## STEEL Quick Release Race Pack

Pack of 10 17mm black zinc steel quick release studs, complete with rivets and rivet-on clips

£24.99

## Motorcycle Parts

### Fuel Cap Kits

FROM £3.99

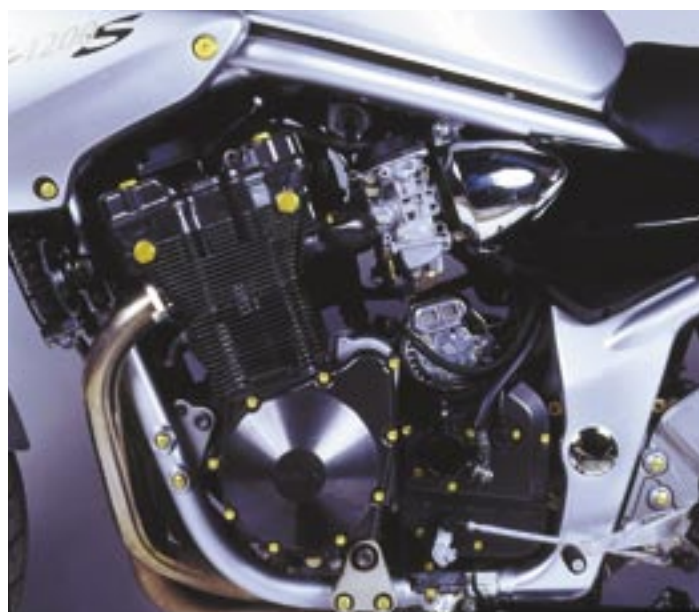

These are the bolts that fit into the fuel cap surround - they are available for all bikes including the specially engineered Honda bolts. Kits are very easy to fit – remove one bolt at a time and replace with an identical length Pro-Bolt.

### Engine Kits

FROM £19.99

Our Engine Kits include all the necessary bolts to replace all side engine-casing bolts in your chosen colour. Also included are copper grease lubricant and the necessary allen keys to fit. Kits are easy to use – remove one bolt at a time, and replace with an identical length bolt from your Pro-Bolt kit. **Please note:** Oil Filler Caps and Cam Bolts are sold separately.

See price list for specific fitment for each model

**Pro-Bolt High Tensile Aluminium:** all products available in Blue, Black, Gold, Green, Purple, Red and Silver

## Cam Cover Bolts / Cylinder Head Bolts

FROM **£4.99**

### To Fit Suzuki Bandit / GSXR – from £4.99 each *Top Rocker Cover & Cam Bolt Sets*

A must for any Suzuki. Replace dull and rusty Cam Bolts. Made especially for GSXR and Bandits. Supplied with a smooth plain finish. The finishing touch to any engine! Available individually or as a full set of 12. (8 top & 4 side.)

### To Fit Yamaha Fazer / XJR

– **£5.99 each**

Available individually or as a set of 8.  
Fits: Fazer 600,  
Fazer 1000, XJR1200,  
XJR1300

## Oil Filler Caps

**£10.99**

Machined to a smooth finish in your choice of colour – complete with 'O' ring. Each has a hole drilled in the top corner to allow the use of lock wire. Nine sizes available to cover a wide range of models.

|         |           |               |

FROM **£10.99**

## Yoke Caps

PER PAIR **£19.99**

Pair of aluminium Yoke Caps. These caps slip over the pre-loads and rest neatly on the yoke. Each is then held securely in place with 2 steel grub screws. Excellent idea for covering up scratches and tidying up the yoke nicely.

## ALUMINIUM

## Pre-Load Adjusters

PAIR £29.99

They look fantastic and they're functional. Allows easy adjustment of the compression of your springs – to adapt to pillion passengers and different road types. Supplied with steel grub screws to hold in place and an allen key to fit. Sizes available to fit most models.

**Please Note:** may not be compatible if a steering damper is fitted.

**Pro-Bolt High Tensile Aluminium: all products available in Blue, Black, Gold, Green, Purple, Red and Silver**

## Sprocket Nuts

**£15.99**

Brighten up your rear end!  
 Available in 10mm & 12mm sizes.  
 Manufactured using aerospace  
 grade alloy, each has a stainless  
 steel thread insert for extra  
 strength. Refer to fitting and  
 torque instructions provided.  
 Sold in packs of 6.

## Bar Ends

**FROM £10.50**

We offer a range of 16 different fitments for specific models  
 as well as 'universal' bar ends to fit any aftermarket or hollow  
 bars - a bit of colour where you can see it!! Smooth finish and  
 comes complete with necessary fittings.

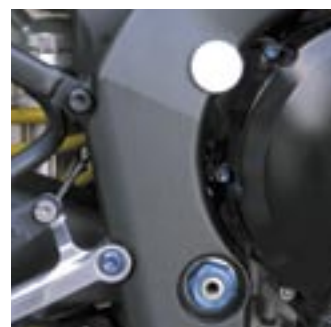

**ALUMINIUM****Frame Plugs**FROM **£10.50**

Plug unsightly holes! Simple to fit. Supplied with 'O' rings and silicone to ensure they stay put.

Premium A4 Stainless Steel, made to Pro-Bolt specifications and polished to a mirror finish

## Why is Stainless Steel 'stainless'?

Stainless steels are iron alloys with a minimum of 10.5% chromium with other elements (Nickel, Molybdenum, Titanium, Copper, Carbon, Nitrogen) added to enhance properties such as formability and strength. But it is the chromium-rich, oxide film that gives the corrosion resistance of stainless steel. This protective film is strong and chemically stable (i.e. passive) where there is sufficient oxygen on the surface. This strong protective film is extremely thin and will usually self repair if sufficient oxygen available. Under certain conditions the passive state can be broken down and corrosion can result.

## Applications

Initially developed for use in paper mills, 316 stainless steel is now typically used in:

- Food processing equipment
- Brewery equipment
- Chemical & petrochemical equipment
- Laboratory benches & equipment
- Coastal architectural panelling
- Coastal balustrading
- Chemical transportation containers
- Boat fittings
- Heat exchangers
- Mining screens
- Nuts & bolts
- Springs
- Medical implants

## Alloy Designations

Stainless steel 316 also corresponds to the following standard designations and specifications:

| Euronorm | UNS    | BS     | En  | Grade |
|----------|--------|--------|-----|-------|
| 1.4401   | S31600 | 316S31 | 58H | 316   |

## Heat Resistance

316 has good resistance to oxidation in intermittent service to 870°C and in continuous service to 925°C. However, continuous use at 425-860°C is not recommended due to its resistance to carbide precipitation.

Where high strength is required at temperatures above 500°C, grade 316H is recommended.

| TYPICAL CHEMICAL COMPOSITION |         |
|------------------------------|---------|
| %                            | 316     |
| C                            | 0.08max |
| Mn                           | 2.0     |
| Si                           | 0.75    |
| P                            | 0.045   |
| S                            | 0.03    |
| Cr                           | 16-18   |
| Mo                           | 2-3     |
| Ni                           | 10-14   |
| N                            | 0.1     |

| TYPICAL MECHANICAL COMPOSITION |     |
|--------------------------------|-----|
| Grade                          | 316 |
| Tensile Strength (MPa)         | 515 |
| Compression Strength (MPa)     | 170 |
| Proof Stress 0.2% (MPa)        | 205 |
| Elongation A5 (%)              | 40  |
| Hardness Rockwell B            | 95  |

| TYPICAL PHYSICAL COMPOSITION |                                   |
|------------------------------|-----------------------------------|
| Property                     | Value                             |

## Stainless Steel Grade A4/316

### Why buy A4 (316) Stainless Steel fastenings?

A2 and A4 are known as Austenitic grade of stainless steel with the A4 grade having a higher corrosion resistance than A2. They are both non-magnetic.

Grade A4 (AISI 316) has a higher corrosion resistance than A2 grade in many chemical environments, including contact with dilute sulphuric acid, and acetic acid. Suitable for marine conditions, but not recommended for immersion in sea water.

### Is Stainless Steel environmentally friendly?

Recycled scrap is used to produce over 90% of new stainless steel, and all stainless steel is fully "recyclable" at the end of its useful life. Great care is taken to minimise fume and dust emissions in the production of stainless steel. The steel is melted electrically and in most cases refined by using inert air distilled gases, such as argon. Life expectancy in stainless steels is usually long because of their corrosion resistant quality. Only minimum maintenance is needed therefore eliminating the environmental problems and costs of painting or galvanizing. Stainless steel is easy to clean and safe, being widely used for catering equipment and food manufacturing.

Premium A4 Stainless Steel, made to Pro-Bolt specifications and polished to a mirror finish

## Product Range

Our Stainless Steel range offers stylish heads, strength and a superior finish you will not find anywhere else. A4 Stainless Steel is equivalent in weight to manufacturers' originals. These bolts are hard wearing, very durable, and highly resistant to corrosion. Absolutely no polishing required, these are 'mirror' finish.

### Tapered Socket Cap Bolts

| Thread | Pitch mm | Length mm |
|--------|----------|-----------|
| M5     | 0.8      | 10 - 30   |
| M6     | 1.00     | 10 - 90   |
| M8     | 1.25     | 20 - 60   |
| M10    | 1.25     | 25 - 85   |

### Flanged Hex Head Bolts

| Thread | Pitch mm | Length mm |
|--------|----------|-----------|
| M5     | 0.8      | 10 - 30   |
| M6     | 1.00     | 10 - 90   |
| M8     | 1.25     | 20 - 60   |
| M10    | 1.25     | 25 - 85   |

### Dome Head / Fairing / Screen Bolts

| Thread | Pitch mm | Length mm |
|--------|----------|-----------|
| M5     | 0.8      | 16 - 25   |
| M6     | 1.00     | 16 - 40   |

### Sprocket Nuts

|            |               |               |
|------------|---------------|---------------|
| 8mm 1.25mm | 10mm x 1.25mm | 12mm x 1.25mm |
|------------|---------------|---------------|

### Disc Bolts

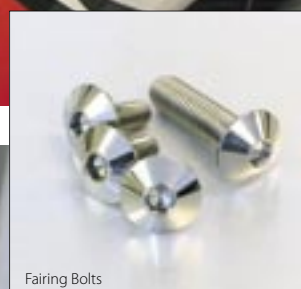

For: Kawasaki, Suzuki, Yamaha, Ducati, Aprilia, Honda & Triumph

### Suzuki GSXR / Bandit Cam Bolts

Cam Cover Bolt/Cylinder Head Bolts for the Suzuki range of GSXR/Bandits

### Bolt Kits for:

Engine Kits  
Fairing Kits  
Screen Kits  
Fuel Cap Kits  
Front Axle Pinch Bolt Kits  
Front/Rear Caliper Mount Bolt Kits  
Front/Rear Caliper Pinch Bolt Kits  
Top/Bottom Yoke Clamp Bolts  
Clip-on Handle Bar Bolts  
Brake and Clutch Perch Pinch Bolts

Fairing Bolts

Sprocket Nuts

Disc Bolts

**STAINLESS STEEL**

Tapered Socket Cap Bolts

Flanged Hex Head Bolts

Pro-Bolt is the first to offer bolts of this quality. The finish is 'mirror' – you will save potentially hours of dirty polishing. It really is 'fit-and-forget'! If you're tired of looking at the same old rusty bolts, it's time to try our buffed nuts – they will last for years!

We have pre-measured bolt kits for a huge range of bikes – see our specific stainless steel price list for prices.

Kits are designed as a direct replacement for rusty originals. Remove one bolt at a time and replace with Pro-Bolt Stainless. Lubricant and stickers are also provided.

Flanged Hex Head Bolts

## TITANIUM MATERIAL SPECIFICATION: 6AL-4V (GRADE 5)

Ti-6Al-4V, an alloy introduced in 1954, comes as close to being a general-purpose grade as possible in titanium – in fact, it's considered the workhorse titanium alloy and is available in all product forms. Its density is 0.160 pounds per cubic inch. It can be heat-treated to ultimate strengths in excess of 170,000 PSI and responds to heat-treatment in sections up to 15mm. This alloy is stable at temperatures ranging from 423 degrees F to over 1000 degrees F.

### MANUFACTURING PROCESS

Tapered Socket Cap – *forged head with rolled threads*; Flanged Hex Heads – *machined heads with rolled threads*; Other Items – *machined from bar*

#### Ultimate Strength

(PSI): 120,000 - 160,000

#### Yield Strength

(PSI): 115,000 - 145,000

#### Weight

42% lighter than steel

#### Corrosion

Very high resistance to corrosion

### SAFETY

Before you start work on your machine ensure the bike is secure, positioned on a paddock stand where necessary. Titanium can be used in safety critical areas - with the nature of these parts it is essential to use the correct torque and fit with care. After fitting new parts we recommend you take your motorcycle for a short test ride - riding with care. Examine parts after the test ride to ensure all parts are secure. Should you have any queries, please contact Pro-Bolt directly before riding your bike.

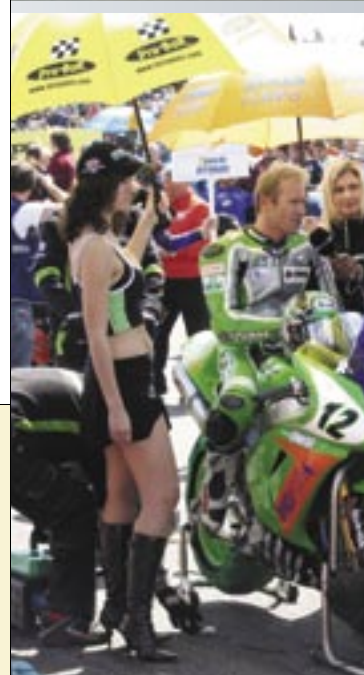

| Bolt Diameter | Nm 6AL-4V (Grade 5) |
|---------------|---------------------|
| M3            | 1.73                |
| M4            | 3.57                |
| M5            | 6.90                |
| M6            | 11.10               |
| M8            | 28.30               |
| M10           | 57.60               |
| M12           | 97.50               |
| M14           | 155.20              |
| M16           | 235.70              |

### TORQUE

Wherever possible, use torque values specified by your equipment manufacturer. For titanium fasteners in general use, please refer to the torque values listed. We recommend anti-seize or moly paste be applied to the threads to prevent galling.

### Comparison Between Mechanical Properties of titanium alloy Ti Al6-V4 and other structural materials:

|                                       | Ti Al6-V4 | Alloy Steel | Stainless Steel | Aluminium Alloy 2024 |
|---------------------------------------|-----------|-------------|-----------------|----------------------|
| <b>Density (g/cm³)</b>                | 4.4       | 7.8         | 7.9             | 3.0                  |
| <b>U T S (Kg/mm²)</b>                 | 92        | 70          | 60              | 45                   |
| <b>Yield Strength (Kg/mm²)</b>        | 84        | 55          | 29              | 35                   |
| <b>Elongation (%)</b>                 | 12        | 25          | 54              | 9                    |
| <b>Modulus of Elasticity (Kg/mm²)</b> | 11.000    | 21.490      | 20.30           | 7.100                |

All our titanium products are available in the following finishes:

- Natural
- Blue
- Gold
- Purple Haze

## BOLTS, NUTS &amp; WASHERS

## Race-Spec Bolts

New generation of bolts! Our Race-Spec Bolts are designed for racers, enthusiasts and those who like attention to detail, by reducing the socket size/head diameter and scooping out the head to reduce weight. On average, these bolts weigh a massive 45% less than steel equivalents – and all this with no compromise in strength. All these advantages are recognised and used widely by top race teams.

| Part Number | Thread Diameter and Thread | Length | Thread Length | Head Diameter | Hex Dia. A/F |

| M16      | 2.00     |
| M16 Fine | 1.25     |

### Nyloc Nuts

| Thread   | Pitch mm |
|----------|----------|
| M3       | 0.5      |
| M4       | 0.7      |
| M5       | 0.8      |
| M6       | 1.00     |
| M8       | 1.25     |
| M10      | 1.50     |
| M10 Fine | 1.25     |
| M12      | 1.75     |
| M12 Fine | 1.50     |

## Washers

### Flat Washers

| To fit thread | outside diameter mm |
|---------------|---------------------|
| M3            | 7                   |
| M4            | 9                   |
| M5            | 10                  |
| M6            | 12                  |
| M8            | 16                  |
| M10           | 20                  |
| M12           | 24                  |
| M14           | 28                  |
| M16           | 30                  |
| M22           | 37                  |

### Penny Washers

| To fit thread | outside diameter mm |
|---------------|---------------------|
| M5            | 15                  |
| M5            | 20                  |
| M6            | 25                  |
| M6            | 30                  |
| M8            | 20                  |
| M8            | 25                  |
| M8            | 30                  |

### Drilled Washers

| To fit thread | outside diameter mm |
|---------------|---------------------|
| M5            | 10                  |
| M6            | 12                  |
| M8            | 16                  |
| M10           | 20                  |
| M12           | 24                  |
| M14           | 28                  |
| M16           | 30                  |
| M28           | 48                  |

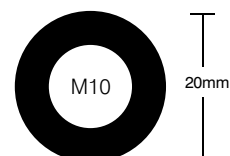

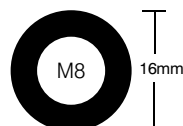

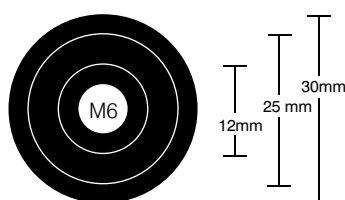

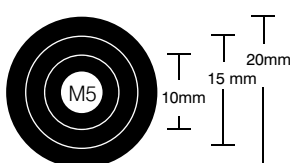

### Spring Washers

| To fit thread | outside diameter mm |
|---------------|---------------------|
| M5            | 8                   |
| M6            | 10                  |
| M8            | 12                  |
| M10           | 16                  |
| M12           | 25                  |
| M14           | 28                  |

### Countersunk Washers

| To fit thread | outside diameter mm |
|---------------|---------------------|
| M6            | 22                  |
| M8            | 25                  |

### Size Guide

See price list for specific fitment for each model

## BOLTS, NUTS &amp; WASHERS

## Top Yoke Nuts (Centre of Stem)

Long lasting replacement of the stock steel originals.  
See price list for specific fitment guides.

| Part Number | Top Yoke Nuts                               | Natural | Blue/Gold/<br>Purple Haze |
|-------------|---|---------|---------------------------|
| TIYOKE10    | Honda Yoke Nut - M24 x 1.00                 | £18.99  | £19.49                    |
| TIYOKE20    | Kawasaki Yoke Nut - M25 x 1.00              | £19.99  | £20.49                    |
| TIYOKE30    | Suzuki Yoke Nut - M24 x 1.50                | £18.99  | £19.49                    |
| TIYOKE40    | Yamaha Yoke Nut - M28 x 1.00                | £18.99  | £19.49                    |
| TIYOKE50    | Yoke Nut - Various M22 x 1.00 - 30mm socket | £18.99  | £19.49                    |
| TIYOKE60    | Yoke Nut - Various M22 x 1.00 - 27mm socket | £18.99  | £19.49                    |
| TIYOKE110   | Yoke Nut - Honda NC30/NC35                  | £34.99  | £35.49                    |

## Linkage Bolts

For racers and serious enthusiasts - these offer a significant weight saving over the steel originals.

| Part Number    | Rear Shock Linkage Bolts                                  | Natural | Blue/Gold/<br>Purple Haze |
|----------------|---|---------|---------------------------|
| TILINK1055-14  | Linkage Bolt - M10 (1.25) x 55mm - 14mm head/14mm thread  | £14.00  | £14.50                    |
| TILINK1058-20  | Linkage Bolt - M10 (1.25) x 58mm - 20mm head/20mm thread  | £14.25  | £14.75                    |
| TILINK1066-22  | Linkage Bolt - M10 (1.25) x 66mm - 14mm head/22mm thread  | £17.99  | £18.49                    |
| TILINK1070-18  | Linkage Bolt - M10 (1.25) x 70mm - 15mm head/18mm thread  | £17.99  | £18.49                    |
| TILINK1080-22  | Linkage Bolt - M10 (1.25) x 80mm - 14mm head/22mm thread  | £22.99  | £23.49                    |
| TILINK10130-18 | Linkage Bolt - M10 (1.25) x 130mm - 15mm bush/18mm thread | £39.99  | £40.49                    |
| TILINK10135-18 | Linkage Bolt - M10 (1.25) x 135mm - 20mm head/18mm thread | £41.99  | £42.49                    |
| TILINK12265-22 | Linkage Bolt - M12 (1.25) x 265mm - 35mm head/22mm thread | £89.99  | £90.49                    |
| TILINK12302-22 | Linkage Bolt - M12 (1.25) x 302mm - 10mm bush/22mm thread | £99.99  | £100.49                   |

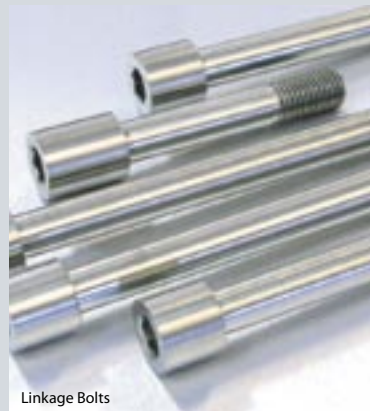

## Sprocket Studs

Huge weight saving - a must for racers!

| Part Number | Description             | Price      |
|-------------|-------------------------|------------|

## Caliper Parts

Prices of all Kits  
on this page vary  
depending on model

### Front & Rear Caliper Mount Bolt Sets

Supplied in kit form with Copper Grease, these replace the bolts that mount the caliper fork legs.

We use either Flanged Hex Head or Tapered Socket Cap Bolts when replacing the originals.

### Front & Rear Brake Caliper Pinch Bolts

These are the bolts that go through the caliper itself, pinching the caliper together.

| Part Number  | Natural | Blue/Gold/Purple Haze |
|--------------|---------|-----------------------|
| TIBN7        | £8.00   | £8.50                 |

Bleed Nipples

## Caliper Pins

Again, a very popular item to change as the originals look so bad, so quickly.

| Part Number | Caliper Pad Retaining Pins                              | Price |
|-------------|---|-------|
| TISPDUC02   | "Ducati Pad Retaining Pin - 748, 916, 996, 998"         | £6.45 |

Banjo Bolts

## Axle Nuts, Spindle Bolts and Swinging Arm Nuts

► All products are available in Natural, Blue, Gold and Purple Haze

Replace the rusty originals with the light, bright and cost effective originals. In most cases our Axle Nuts are manufactured with a captive washer.

See Price List for specific model fitment. When fitting, use the same torque as manufacturer's originals.

## Motorcycle Bolt Kits

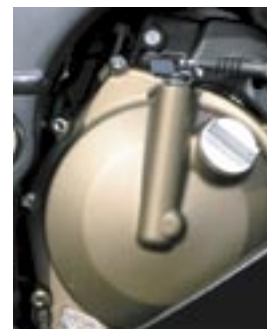

**Our bolt kits make it so easy to customise your bike!**

See Price List for availability

Prices of Kits on  
this page vary  
depending on model

### Engine Casing Bolts

Our Engine Kits will replace all the side-casing bolts. A direct one-for-one replacement. Remove one at a time and replace with identical length titanium bolts from your kit. Tapered Socket Cap Bolts are used in engine kits - we can supply Flanged Hex Head Bolts on request (at a supplement). Lubricant and stickers included.

### Fairing Kits

Includes all the necessary bolts, nuts and washers to replace all the Fairing Bolts, including side fairing, belly pan, seat unit and mudguard. Anti-scratch bodywork Washers, Spacers, Copper Grease Lubricant and Allen Keys are also included. Where a Fairing Kit is originally quick release action, this will be replaced with a standard threaded bolt and 'u' clip unless otherwise stated.

**Please note:** Screen Kits are sold separately.

### Screen Kits

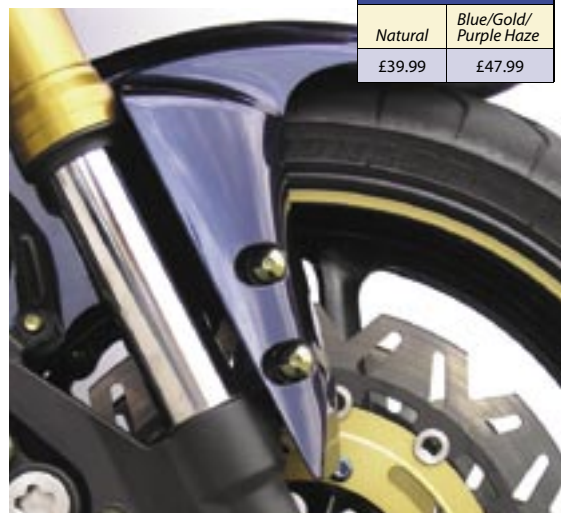

M5 x16 Fairing Bolts supplied with anti-scratch Washer and brass Wellnuts. We also offer a specific kit for the Ducati 748/916/996 (as shown in picture).

### Mudguard Hugger Kit

We offer a standard Mudguard/Hugger Kit which consists of 8 Dome Head Bolts each measuring M6 thread x 20mm in length – the head diameter is 16mm. This is not guaranteed to fit every bike, but is a very popular combination – you will need to check that your requirements match. This kit comes with anti-scratch Washers, Lubricant and Allen Key.

| Price   |                           |
|---------|---------------------------|
| Natural | Blue/Gold/<br>Purple Haze |
| £39.99  | £47.99                    |

See price list for specific fitment for each model

## Quick Release Fasteners

Rather exotic item for the real show-bike! Available in 17mm and 19mm lengths (measured from under the head) – 17mm is the size required for the Yamaha R1, Ducati 748/916 and 996/998/999 etc.

## Individual Quick Release Fasteners

| Description                               | Natural Finish | Blue/Gold/Purple Haze |
|---|----------------|-----------------------|
| D-Ring fasteners - in 17mm & 19mm lengths | £15.99         | £16.49                |
| Allen Key Drive - in 17mm or 19mm lengths | £14.99         | £15.49                |

## Quick Release Fairing Kits

Our Quick Release Fairing Kits will provide D-ring ¼ turn replacements where quick release are present as standard. All other bolts on the side fairing, mudguard, belly-pan and seat unit will be replaced with standard threaded bolts.

## Front Axle Pinch

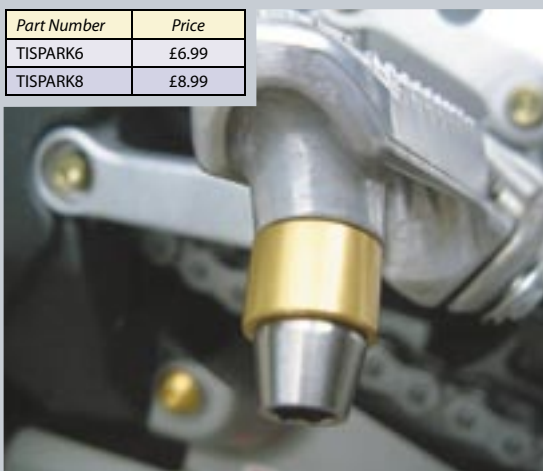

Supplied in Kit form with Copper Grease – these replace the bolts at the bottom of the forks.

## Scratch & Spark Sets

For those who like to get down – you'll get some serious sparks from these! Titanium bolt, with your colour choice of alloy collar. We offer 6mm & 8mm.

| Part Number | Price |
|-------------|-------|
| TISPARK6    | £6.99 |
| TISPARK8    | £8.99 |

## RACE-SPEC Front Axle Pinch Bolt Kit

Upgrade further to our amazingly low weight RACE-SPEC bolts. Pre-drilled across the flats, reduced socket size and scooped out head for maximum weight saving with no compromise in strength. These bolts are used by top race teams. The most common size bolt, M8 x 40mm, weighs just 9.5gms - compared to 18.5gms of the average steel original.

## Exhaust Hanger Bolts

M8 thread x 30mm length with pre-drilled head.

| M8 Thread x 30mm length with pre-drilled head | Price |
|---|-------|
| Natural                                       | £6.25 |
| Blue/Gold/Purple Haze                         | £6.75 |

## Motorcycle Bolt Kits

### BOLT KITS

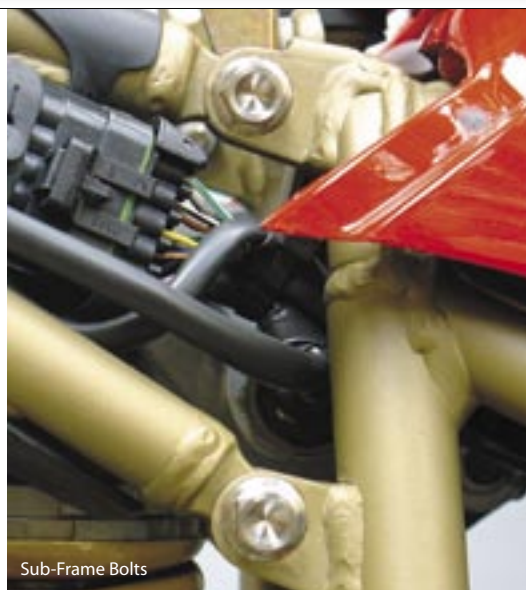

▶ Our bolt kits make it so easy to customise your bike!  
See Price List for availability

### Sub-Frame Bolt Kits

These are the bolts that bolt the main sub-frame on, where necessary. Supplied with Washers and Nyloc Nuts.

### Top & Bottom Triple Clamp Bolt Sets

Supplied in kit form with Copper Grease - these are the fork-to-yoke clamp bolts.

Sub-Frame Bolts

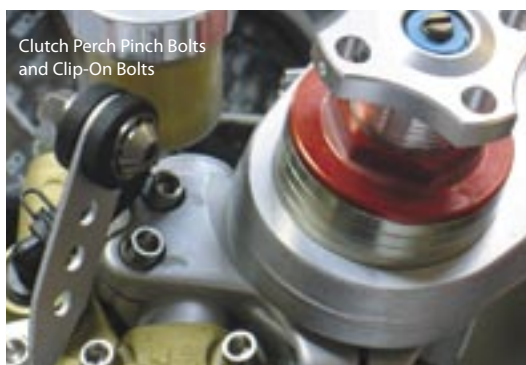

Clip-On Handle Bar Set (left);  
Brake and Clutch Pinch Perch Bolts (centre)

### Brake & Clutch Perch Pinch Bolts

The bolts that pinch together the Brake and Clutch Perches on the handlebars.

### Clip-On Handlebar Sets

These bolts pinch the handlebar to the yoke.

Clutch Perch Pinch Bolts  
and Clip-On Bolts

### Rider & Pillion Footrest Hanger Bolt Kits

The bolts that mount the footrest hangers - these include the special Kawasaki shouldered bolts

Pillion Footrest Hanger Kit

Footrest Hanger Kit

## ATTENTION TO DETAIL

### Axle Adjuster Bolts

**TITANIUM****Titanium Rod****DETAIL TITANIUM**

We offer Titanium Rod in 250mm (approx) or 1m lengths.

**Note:** we would advise that care is taken when machining titanium as it is flammable and ideally requires cooling. Wear on tooling is also extensive.

| Part No      | Description                                       | Price   |
